Reviews

The most effective publication i at any time go through. This is certainly for all those who statte that there had not been a worthy of looking at. Its been printed in an extremely straightforward way which is merely soon after i finished reading this publication where basically changed me, change the way in my opinion.

In the case of all ordinary seeds, the drier the seeds the longer they are likely to last, and this applies more especially to starchy seeds. The chief factor in longevity is the inherent character of the seed itself. In 1894³ I showed that seeds capable of withstanding thorough drying assume a perfectly dormant condition in which they do not respire and are not living, although they have a power of restoring life potential in them for a longer or shorter period of years. Similar conclusions were made by de Candolle, who appears to have considered that all seeds, if carefully dried and preserved, would retain an indefinitely prolonged power of 1 Crocker (i.e.) has thrown considerable doubt on the correctness of Fischer's views, 2 Bulletin de la Soc. bot. de France, 1903, t. This is, however, incorrect, and according to Recquerel, only those seeds can preserve their vitality for long periods of time which are protected by thick coats impermeable to water and oxygen, and which have feebly oxidizable reserve materials. This is, however, only a partial truth. It is a fact that starchy seeds last longer than oily ones,...
