Brand New Book ***** Print on Demand *****.Excerpt from Poetry and the Individual, Vol. 1: An Analysis of the Imaginative Life in Relation to the Creative Spirit in Man and Nature The word Idealism has two very different meanings in modern thought. On the one hand, there is the more popular and intelligible meaning in which it signifies belief in patterns or types governing human conduct as goals of endeavour though never perfect in realisation - the sense in which it stands for faith in ideals. On the other, there is the more recondite and metaphysical meaning in which it designates the philosophical theory that the essential nature of the world is of a kind with human consciousness, that the truth of reality is embodied ideas. Both of these conceptions hark back to Plato. But with Plato they have no such mutual distinction as in modern thought. With him the ethical consciousness was too keen, the moral and aesthetic motives too lively, to be even partially obscured in his apprehension of the cosmos as a whole. The Ideas which he conceived as forming the pattern and governance of the world are essentially Ideals, and the Supreme Idea is the Good.
