

Properties and Chemistry of Biomolecular Systems

Filesize: 9.53 MB

Reviews

This pdf is so gripping and fascinating. It really is rally intriguing throgh looking at period of time. I am pleased to tell you that this is basically the very best publication we have go through within my personal lifestyle and might be he very best ebook for ever.

(Eleonore Muller DVM)

PROPERTIES AND CHEMISTRY OF BIOMOLECULAR SYSTEMS

Book Condition: New. Publisher/Verlag: Springer Netherlands | Proceedings of the Second Joint Greek-Italian Meeting on Chemistry and Biological Systems and Molecular Chemical Engineering, Cetraro, Italy, October 1992 | Proceedings of the Second Joint Greek-Italian Meeting on Chemistry and Biological Systems and Molecular Chemical Engineering, Cetraro, Italy, October 1992 | During the last decade, interest in the chemistry of biological systems, as well as in molecular chemical engineering, has grown considerably. Many fields in modern chemistry are contributing to a better understanding of elementary mechanisms of various biological processes and this has resulted in the development of new classes of organic and organometallic compounds with specific and high biological activity. Such a multidisciplinary approach creates opportunities for an exchange of ideas and the need to create a common language. This volume contains a collection of papers, written by leading scientists which collectively provide a rich overview of current research activities relating to the chemistry of biological systems. These papers emphasize the interdisciplinary nature of this research. For researchers in academia and industry whose work involves the chemistry and properties of biomolecular systems. | Intrinsic and Environmental Effects on Protomeric Equilibria in the Ground and Excited Electronic States of Biological Systems.- Ternary Complexes of Pt(II) and Pt(IV) with Aminoacids and Nucleobases.- Free Radicals in Biological Systems.- The Role of Oxygen in Radiolysis of Aqueous Solutions of Magnestum-Guanosine-5'-Monophosphate Complexes.- Interaction of Alkaline and Alkaline-Earth Metal Ions with Nucleosides.- Thermal Behaviour of Three Ribonucleases.- Denaturation of Biological Macromolecules : New Programs for the Deconvolution of DSC Measurements.- Solvent Effects on the Molecular Organization and Properties of Biological Systems.- Superstructural Informations in the Base Sequences of Nucleic Acids.- DNA Superstructures: Relevance on Physicochemical Properties and in Recognition Mechanism with Proteins.- Redox and pH-Sensitive Polymer-Grafted Membranes: Thermodynamic Characteristics in Drug Delivery.- Iron-Sulfur Proteins:Part II Valence-Specific Assignment...
